1. Introduction

1.1. Purpose

This document is a **User Guide** for **Configurable Shopping Cart extension for Magento**. It describes how work with the extension.

This Magento module simplifies any changes your customers need to make in the shopping cart as it allows to edit and re-configure the products in the cart directly.

2. Installation and License

2.1. System Requirements

The extension works under Magento from 1.4.x and higher.
The extension works with Apache 1.3.x and higher, PHP 5, Linux or IIS.

The extension's correct work is guaranteed with the following browsers:

- IE7, IE8, IE9
- FireFox 4.x, 5.x
- Google Chrome 15.x
- Safari 5.x

The correct work with other Magento versions, other browsers and Apache/PHP versions is not guaranteed.

2.2. Installation

All our Magento extensions and templates are installed via **IToris Installer**.

Download **IToris Installer** from here <http://www.itoris.com/itoris-magento-installer.html> and un-pack to the root of your website. It will then appear in menu **System ->IToris extensions -> IToris Installer**.

Open it and you will see all our Magento Extensions and Templates, both installed and available. You can install, update and un-install them with one click now.

Find **Configurable Shopping Cart** in the list of extensions and press **Install** button. It will ask for the license key that you will receive after the purchase. Enter the key and submit. The extension will be installed. It will be available in menu **System ->IToris extensions -> Configurable Shopping Cart**.

2.3. License

Configurable Shopping Cart extension is website-dependent. By 'website' here we understand the website in Magento terms. Under one Magento installation one license key of the extension can activate all stores/storeviews. within one website.

If your configuration has several Magento websites - a separate license will be required for each.

You can switch the license from one website to another – login to <http://www.itoris.com> using the credentials you will receive after the purchase. Go to **My Downloads** area, find your key there and reset it from the current website. Then use it again to activate another website.

The license also includes free life-time updates for the extension.

3. How to Use

3.1. Main Settings

Install **Configurable Shopping Cart** and open it in admin area (**System** → **IToris extensions** → **Configurable Shopping Cart**). You will see Settings area.

To activate the extension on your website select 'Enabled' = **Yes**.

You can enable the extension for the selected stores only. To do it please select a store on the left. Uncheck 'Use Website' setting and select the setting for this store individually. Repeat the same for the rest of the stores.

3.2. Languages' Settings

Different languages can be used for different stores in the module. By defaults the module is provided in English.

To translate it for stores please open **app/locale/en_En** in your Magento and find **Itoris_ConfigShopCart.csv** file there.

Copy the file to the locale you need and open the copy for editing.

The file will contain each phrase twice. Translate the second part of each phrase and save the changes.

3.3. Front-end. Configurable Shopping Cart

As soon as the extension has been activated, it will substitute default Magento shopping cart for the selected stores.

When customers now open shopping cart, they see ability to configure their selections directly inside the cart.

Once all options and configurations have been re-selected, customers press Update Shopping Cart button to apply all changes.

3.3.1. Simple Products

For simple products no significant difference will be visible.

3.3.2. Configurable Products

Configurable Products now will provide ability to reselect all their available options directly in the shopping cart.

The screenshot shows a shopping cart interface with a dark blue navigation bar containing 'Furniture', 'Electronics', and 'Apparel'. Below the bar, the page title is 'Shopping Cart' and there is an orange 'Proceed to Checkout' button. The main content area features a table with columns for 'Product Name', 'Unit Price', 'Qty', and 'Subtotal'. The first row lists 'CN Clogs Beach/Garden Clog' with a unit price of \$16.99 and a quantity of 1, resulting in a subtotal of \$16.99. To the left of the table is a small image of a blue clog. Below the product name, there are two dropdown menus under the heading 'Options:'. The first is 'Gender*' with 'Mens' selected. The second is 'Shoe Size*' with '10 +\$1.00' selected. A red asterisk note '*required fields' is visible on the right side of the options section.

Reselection will also update the product's price on-the-fly.

This screenshot is identical to the previous one, showing the same shopping cart interface. However, the 'Shoe Size*' dropdown menu is now set to '12 +\$3.00'. Consequently, the 'Unit Price' in the table has updated to \$18.99, and the 'Subtotal' has updated to \$18.99. The 'Gender*' option remains 'Mens'.

3.3.3. Products with Custom Options

Custom options will also become selectable. They will change the total price of the product on-the-fly when options are re-selected. In case a product has both configurable and custom options, they will be divided into two columns.

The screenshot shows a shopping cart interface similar to the previous ones. The navigation bar and 'Shopping Cart' title are present. The table lists 'Coalesce: Functioning On Impatience T-Shirt' with a unit price of \$41.00 and a quantity of 1, for a subtotal of \$41.00. To the left is an image of a green t-shirt. Below the product name, there are two columns of options. The first column, under 'Options:', has a 'Size*' dropdown menu with 'Medium' selected. The second column, under 'Custom options:', has a 'Label* +\$3.00' text input field containing 'label', and an 'Upload image* +\$23.00' section showing a link to 'shirts.jpg' and a '(remove)' link. A red asterisk note '*required fields' is on the right. At the bottom of the cart area, there are two buttons: 'Continue Shopping' and 'Update Shopping Cart'.

If there is upload functionality among custom options - the link to the uploaded file will be displayed as well as ability to remove it. Once the file is removed, there will appear ability to upload a new file.

Furniture Electronics Apparel

Product Name	Unit Price	Qty	Subtotal
 <p>Coalesce: Functioning On Impatience T-Shirt</p> <p>Unit Price: \$18.00 Qty: 1 Subtotal: \$18.00</p> <p>Options:</p> <p>Size* <input type="text" value="Medium"/></p> <p>Custom options: *required fields</p> <p>Label* +\$3.00 <input type="text" value=""/></p> <p>Upload image* +\$23.00 <input type="text" value=""/> <input type="button" value="Browse..."/></p>			

Continue Shopping Update Shopping Cart

3.3.4. Bundle Products

Bundle Products will display all their selections and options in the shopping cart as well. As with the rest of complex products, customers will be able to re-select the options directly in the cart, which will immediately update the price.
