## 1. Introduction

### 1.1. Purpose

This document is a **User Guide** for **Product Grid module for Magento**. It describes how work with the extension.

**Product Grid** provides advanced management of the products in bulk.

## 2. Installation and License

### 2.1. System Requirements

The extension works under Magento from 1.4.x and higher.

The extension works with Apache 1.3.x and higher, PHP 5, Linux or IIS.

The extension's correct work is guaranteed with the following browsers:

- IE7, IE8, IE9
- FireFox 4.x, 5.x
- Google Chrome 15.x
- Safari 5.x

The correct work with other Magento versions, other browsers and Apache/PHP versions is not guaranteed.

### 2.2. Installation

All our Magento extensions and templates are installed via **IToris Installer**.

Download **IToris Installer** from here <http://www.itoris.com/itoris-magento-installer.html> and un-pack to the root of your website. It will then appear in menu **System →IToris extensions → IToris Installer**.

Open it and you will see all our Magento Extensions and Templates, both installed and available. You can install, update and un-install them with one click now.

Find **Product Grid** in the list of extensions and press **Install** button. It will ask for the license key that you will receive after the purchase. Enter the key and submit. The extension will be installed. It will be available in menu **System →IToris extensions → Advanced Product Grid**.

The screenshot displays the Magento Admin Panel interface. At the top, there's a navigation bar with tabs for Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Reports, and System. A dropdown menu is open under the 'System' tab, showing a list of IToris extensions and tools. The 'Advanced Product Grid' option is highlighted. The main content area shows the 'Dashboard' with various sales and order statistics, including 'Lifetime Sales', 'Average Orders', and 'Last 5 Orders'.

## 2.3. License

**Product Grid module** has 2 types of licenses - regular and premium ones.

**Regular** license is website-dependent. By 'website' here we understand the website in Magento terms. Under one Magento installation one license key of the extension can activate all stores/storeviews within one website.

Modules with regular license are partially encrypted.

If your configuration has several Magento websites - a separate license will be required for each.

**Premium** license provides 100% open-source modules. It allows activating the whole Magento installation, including all its websites, stores/storeviews.

Premium license is recommended when you plan customizations.

You can switch the license from one website to another – login to <http://www.itoris.com> using the credentials you will receive after the purchase. Go to **My Downloads** area, find your key there and reset it from the current website. Then use it again to activate another website.

Both licenses also include free life-time updates for the extension.

## 3. How to Use

### 3.1. Activation

To enable the module select **System → IToris extensions → Advanced Product Grid**

The screenshot shows the Magento Admin Panel interface. At the top, there's a navigation bar with tabs: Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Reports, and System (which is currently selected). Below the navigation bar, there's a message bar with a red icon and text: "Latest Message: Imagine 2013 Registration is Now Open! Read details". To the right of the message bar, it says "You have 19 notice unread message(s). Go to messages inbox". The main content area is titled "Configuration" and has a "Save" button in the top right corner. Below the title, there's a table with one row labeled "Enabled" and a dropdown menu set to "Yes". To the left of the configuration table, there's a "Choose Store View:" section with a dropdown menu set to "All Store Views".

**Extension Enabled** - this setting activates the module

There is ability to select its own set of settings for stores/storeviews (use Choose Store View drop-down).

### 3.2. Advanced Product Grid

Once the module has been enabled - standard product management is substituted with advanced product grid. To manage the products now please select **Catalog → Manage Products**

New features are added to product management there as well as existing functionality enhanced.

Choose Store View: All Store Views

ID	Base Image	Name	Categories	SKU	Price	Qty	Status	Websites	Type	Action
166		HTC Touch Diamond	Cell Phones	HTC Touch Diamond	\$750.00	848	Enabled	Main Website	Simple Product	<a href="#">Edit</a>
165		My Computer	Build Your Own	mycomputer		0	Enabled	Main Website	Bundle Product	<a href="#">Edit</a>
164		Gaming Computer	Build Your Own	computer_fixed	\$4,999.95	0	Enabled	Main Website	Bundle Product	<a href="#">Edit</a>
163		Computer	Computers, Build Your Own	computer		0	Enabled	Main Website	Bundle Product	<a href="#">Edit</a>

There is a new button **Configure Product Grid** that allows managing the look and functionality of the products' table.

### 3.2.1. General Options

When **Configure Product Grid** button is pressed - there is ability to configure general options to meet your preferences.

**Product Grid Configuration**

**General Options**

- ☒ Show Configuration Scope
- ☒ Enable Attribute Filter
- ☒ Allow Actions
- ☒ Allow Bulk Option Apply
- ☒ Allow Inline Edit
- ☒ Allow Reorder Grid Columns
- Default Sorting: ID
- Sorting Order: Descending

**Show Attributes**

- ☒ ID
- ☒ Categories
- ☒ Product Type
- ☐ Attribute Set Name
- ☒ Qty
- ☒ Website
- ☐ Activation Information
- ☐ Dimensions
- ☐ Meta Keywords
- ☐ Shirt Size
- ☐ Active From
- ☐ Disk Speed
- ☐ Meta Title
- ☐ Shoe Size
- ☐ Active To
- ☐ Display Actual Price
- ☐ Model
- ☐ Shoe Type

- **Show Configuration Scope**

This setting allows display/hide configuration scope (ability to select to which websites/stores/storeviews the functionality will be applied to)

When the setting is disabled, the scope is not displayed.

Drag to reorder column, click to sort

- Allow Inline Edit

With this setting you can change the products' attributes and properties directly in the table with the list of products. When the setting is enabled - click on a field and it becomes editable.

<input type="checkbox"/>	162		Microsoft Wireless Optical Mouse 5000	Electronics, Computers, Peripherals	micronmouse5000	\$59.99	200	Enabled	Main Website	Simple Product	<a href="#">Edit</a>
<input type="checkbox"/>	161		Logitech diNovo Edge Keyboard	Peripherals	logidinovo	239.99	208	Enabled	Main Website	Simple Product	<a href="#">Edit</a>
<input type="checkbox"/>	160		Logitech Cordless Optical Trackman	Peripherals	logitechcord	\$79.99	200	Enabled	Main Website	Simple Product	<a href="#">Edit</a>

If the setting is disabled - standard Magento product editing is available only (product page should be opened for editing).

- Enable Attribute Filter

This setting activates/removes attribute filter for the products list.

- **Allow Actions**

If this setting is disabled - ability to apply bulk actions to selected products together will disappear.

- **Default Sorting**

This settings allows defining how sorting should be applied by default. The following options are available:

- ID
- Name
- SKU
- Price
- Qty
- Status
- Type

If this setting is disabled, then standard Magento sorting is applied

- **Allow Bulk Option Apply**

This setting adds a new option to the bulk actions - attribute bulk apply. Please note, this setting becomes available only when Allow Actions setting is active.

The new option allows changing an attribute of all selected products in bulk. For example, price or quantity.

Select the products that will have an attribute updated in bulk and check them, then select **actions = attribute bulk apply**.

New value will be applied to all selected products.

- **Sorting Order**

Select if the sorting order (chosen in Default Sorting) should be descending or ascending.

### 3.2.2. Show Attributes

The following area in [Product Grid Configuration](#) is **Show Attributes**. In this area select the attributes that should be displayed in the products' list.

Apart from attributes there are system values that can be selected/deselected for display as well:

- ID
- Qty
- Categories
- Website
- Product Type
- Attribute Set Name

**Product Grid Configuration**
