## 1. Introduction

The document is a User Guide for extension **Bundle Product Promotions** created for Magento websites. It describes the extension functionality and provides some tips for a quick start.

The extension official page – <https://www.itoris.com/magento-bundle-product-promotions.html>

The purpose of the Bundle Product Promotions extension for Magento is to create inseparable bundle promo sets with fixed quantities and trigger discounts based on a chosen price calculation method.

The extension provides a detailed pricing breakdown for each bundle product on the Frontend, allows showing bundled items' images or descriptions and applying one of the calculation methods. For example, the following methods are available: manual discounts for each item, the discount for the entire promo set and fixed price for the entire promo set. Moreover, the extension allows the admin to bundle simple items with custom options and configurable products.

## 2. Installation

### 2.1. System Requirements

The extension works under Magento from 1.4.x and higher.

The extension works with Apache 1.3.x and higher, PHP 5 or higher, Linux or IIS.

### 2.2. Installation

Download the extension installation zip package from your account at <https://www.itoris.com/> and unpack it to the root of your Magento site by (S)FTP. Then flush cache in your Magento backend following **System > Cache Management**.

### 2.3. License

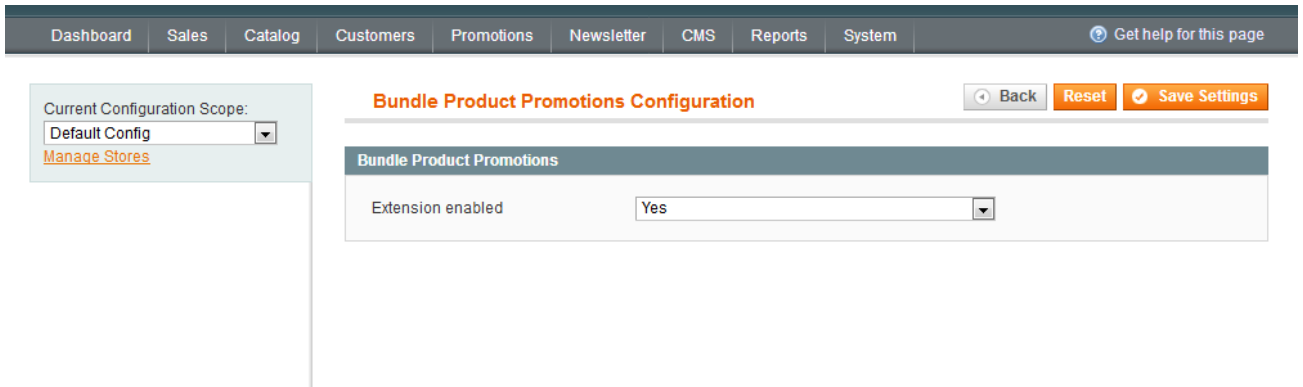

Please find the license agreement at <https://www.itoris.com/magento-extensions-license.html>

## 3. How to Use

### 3.1. General Settings

The general settings are available following **System > ITORIS extensions > Bundle Product Promotions**. The extension allows configuring the setting globally and for each store view.

**Extension enabled** – enables or disables the extension functionality.

The screenshot shows the ITORIS admin interface. At the top, there is a navigation menu with tabs for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System. A 'Get help for this page' link is also present. Below the navigation, the 'Bundle Product Promotions Configuration' page is displayed. On the left, there is a 'Current Configuration Scope' section with a dropdown menu set to 'Default Config' and a 'Manage Stores' link. The main configuration area has a title 'Bundle Product Promotions Configuration' and buttons for 'Back', 'Reset', and 'Save Settings'. Below this, there is a section titled 'Bundle Product Promotions' with a single setting: 'Extension enabled' set to 'Yes' via a dropdown menu.

### 3.2 Create Bundle Promosets

This extension expands the default bundle products functionality and allows adding discounts for bundle products or for each bundled item. All the settings are available in a separate section in the bundle product configuration.

**Show Bundle As** – allows configuring bundled items as default Magento or as a bundle promo set.

**Price calculation method** – allows applying one of the three types of discounts to each bundled item or to the whole set: manual discount for associated products, discount for the entire promo set and fixed price for the entire promo set.

**Show associated products' images** – shows or hides the associated products' images on the Frontend.

**Associated Product image size (px)** – allows specifying the product image size (px).

**Show associated products' descriptions** – shows or hides the associated products' descriptions on the Frontend.

**Associated product description length (chars)** – allows specifying the product description length (chars).

### 3.2.1 Manual discount for associated products

This method helps the admin specify a percentage or fixed discount for each item separately in the promo set. The admin can enter a value manually and choose the fixed or percentage discounts for each item in the new “Discount” column.

Swiss Movement Sports Watch SKU: acj005	1.0000	0	

### 3.3 Bundle Promo sets on the Frontend

This extension shows a detailed price calculation for each bundle promo set in the Frontend. The customers can see a regular and discounted price for each promo set. There is no ability to change the bundled items' quantities. The promo set is inseparable and the items can be purchased together only. Each item in the promo set is linked to the product page. The customers can change the bundle sets quantity and add the bundle product to the cart. The extension also allows adding and configuring products with custom options and configurable products directly in the table.

This is how the bundle product with the fixed price for the entire promo set looks on the Frontend.
