1. Introduction

The document is a User Guide for extension **Grouped Product Configuration** created for Magento websites. It describes the extension functionality and provides some tips for a quick start.

The extension official page – <https://www.itoris.com/magento-grouped-product-options.html>

The purpose of the Grouped Product Configuration extension for Magento is to associate any type of product with grouped products and enable custom options for the associated products. The extension allows adding simple, virtual, bundled and configurable items to grouped products. Moreover, the customers can configure the associated items with custom options or attributes within the grouped products.

The customers can specify the quantities for each associated product in the input boxes available for each item. The admin can also replace all the QTY fields with the check boxes and display the grouped products as a check-list. The total price of selected products is displayed on the grouped product as well.

2. Installation

2.1. System Requirements

The extension works under Magento from 1.4.x and higher.

The extension works with Apache 1.3.x and higher, PHP 5 or higher, Linux or IIS.

2.2. Installation

Download the extension installation zip package from your account at <https://www.itoris.com/> and unpack it to the root of your Magento site by (S)FTP. Then flush cache in your Magento backend following **System > Cache Management**.

2.3. License

Please find the license agreement at <https://www.itoris.com/magento-extensions-license.html>

3. How to Use

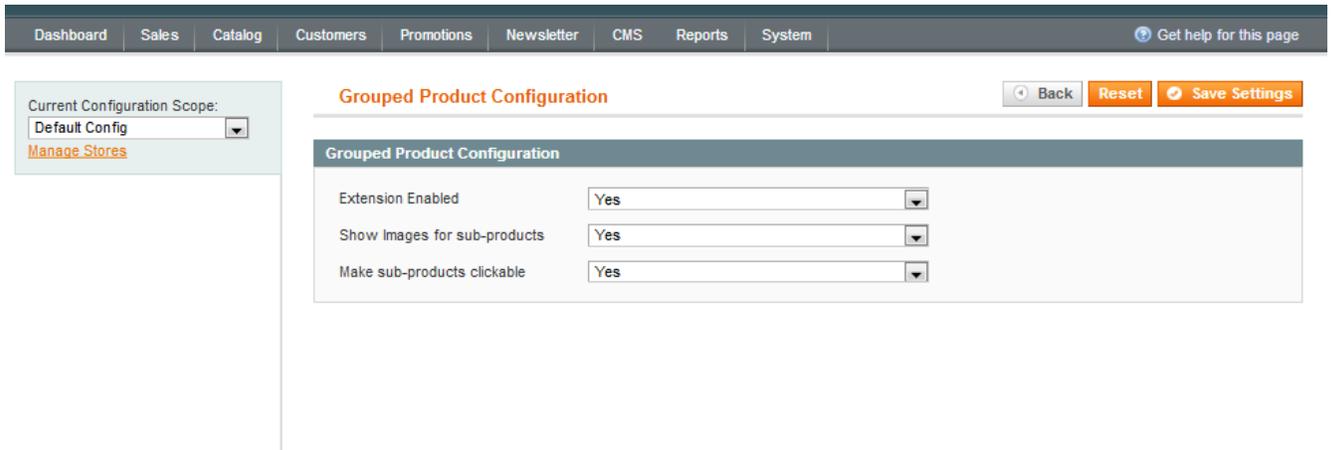

3.1. General Settings

The general settings are available following **System > ITORIS Extensions > Grouped Product Configuration**.

Extension Enabled – enables or disables the extension.

Show images for sub-products – shows the images of associated items added to the grouped product.

Make sub-products clickable – if the customer clicks on an associated item, the extension will redirect them to the associated product page.

The screenshot shows a web application interface with a navigation menu at the top containing: Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System. A 'Get help for this page' link is also present. The main content area is titled 'Grouped Product Configuration' and includes three buttons: 'Back', 'Reset', and 'Save Settings'. On the left, there is a sidebar with 'Current Configuration Scope: Default Config' and a 'Manage Stores' link. The main configuration area contains three settings, each with a dropdown menu set to 'Yes':

Grouped Product Configuration	
Extension Enabled	Yes
Show Images for sub-products	Yes
Make sub-products clickable	Yes

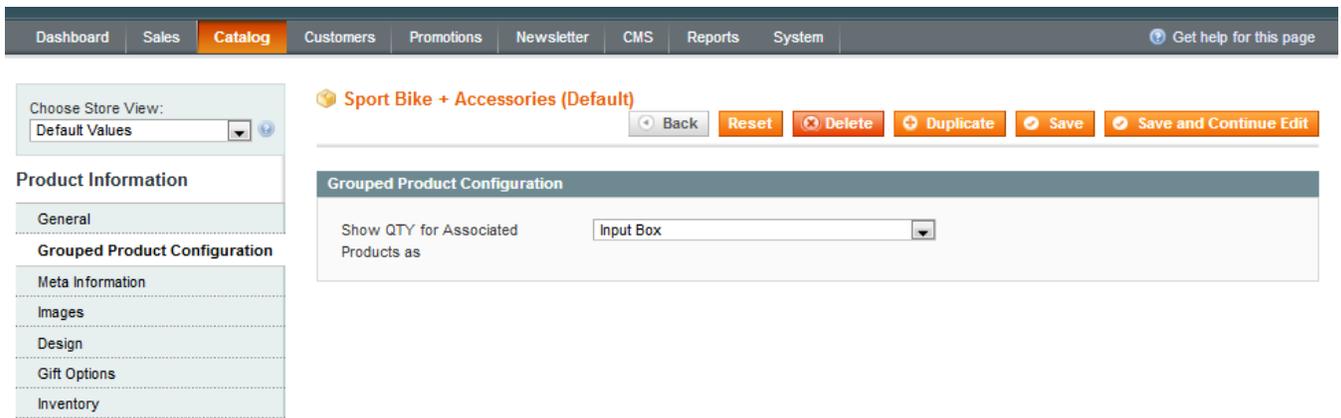

3.2 Grouped Product Configuration

3.2.1 Managing Quantities or Creating a Check-list

The admin can allow the customers to specify quantities for associated products, or convert the entire grouped products into a check-list. The settings are available in **Catalog > Manage Products > {select a grouped product} > Grouped Product Configuration**.

Show QTY for Associated Products as – allows the users to choose the associated items in 2 ways:

- **Input Box** – allows the customers specifying the quantities for the associated items by entering a value into the input box. Product custom options will appear once the quantities are defined.
- **Check Box** – converts the grouped product into a check-list and allows the customers to select the associated items in the grouped product. Custom options will appear when the customer selects a product.

The screenshot displays the ITORIS admin interface. At the top, a navigation bar includes 'Dashboard', 'Sales', 'Catalog' (highlighted), 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. A 'Get help for this page' link is on the right. On the left, a sidebar shows 'Choose Store View' (Default Values) and a 'Product Information' menu with options: General, **Grouped Product Configuration**, Meta Information, Images, Design, Gift Options, and Inventory. The main content area is titled 'Sport Bike + Accessories (Default)' and features action buttons: Back, Reset, Delete, Duplicate, Save, and Save and Continue Edit. Below this, the 'Grouped Product Configuration' section shows 'Show QTY for Associated Products as' set to 'Input Box'.

3.2 Frontend

3.2.1 Grouped Product with Quantities

This is how the associated products are displayed if the admin allows the customers to enter the quantities into the input boxes:
