1. Introduction

The document is a User Guide for extension **Auto Upsells** created for Magento websites. It describes the extension functionality and provides some tips for a quick start.

The extension official page - <https://www.itoris.com/magento-auto-upsells.html>

The purpose of the Auto Upsells extension for Magento is to add more expensive upsells to all products automatically or for each product manually. If the products have the ready-made upsells' lists, the extension allows the admin to keep these products in the lists. Otherwise the extension substitutes the existing upsells' lists. The search algorithm provides quick and relevant results by moving bestsellers to the top of the list, setting a price range, and showing a specified number of upsells on the Frontend.

To show products from different categories, the admin can choose either to search for upsells in a current category or select categories for each product manually.

2. Installation

2.1. System Requirements

The extension works under Magento from 1.4.x and higher.

The extension works with Apache 1.3.x and higher, PHP 5 or higher, Linux or IIS.

2.2. Installation

Download the extension installation zip package from your account at <https://www.itoris.com/> and unpack it to the root of your Magento site by (S)FTP. Then flush cache in your Magento backend following **System > Cache Management**.

2.3. License

Please find the license agreement at <https://www.itoris.com/magento-extensions-license.html>

3. How to Use

3.1. General Settings

The general configuration is available following **System > Itoris Extension > Auto Upsells**. The general settings can be configured globally or for each store view.

Auto Select Upsells Randomly – adds upsells to all products automatically.

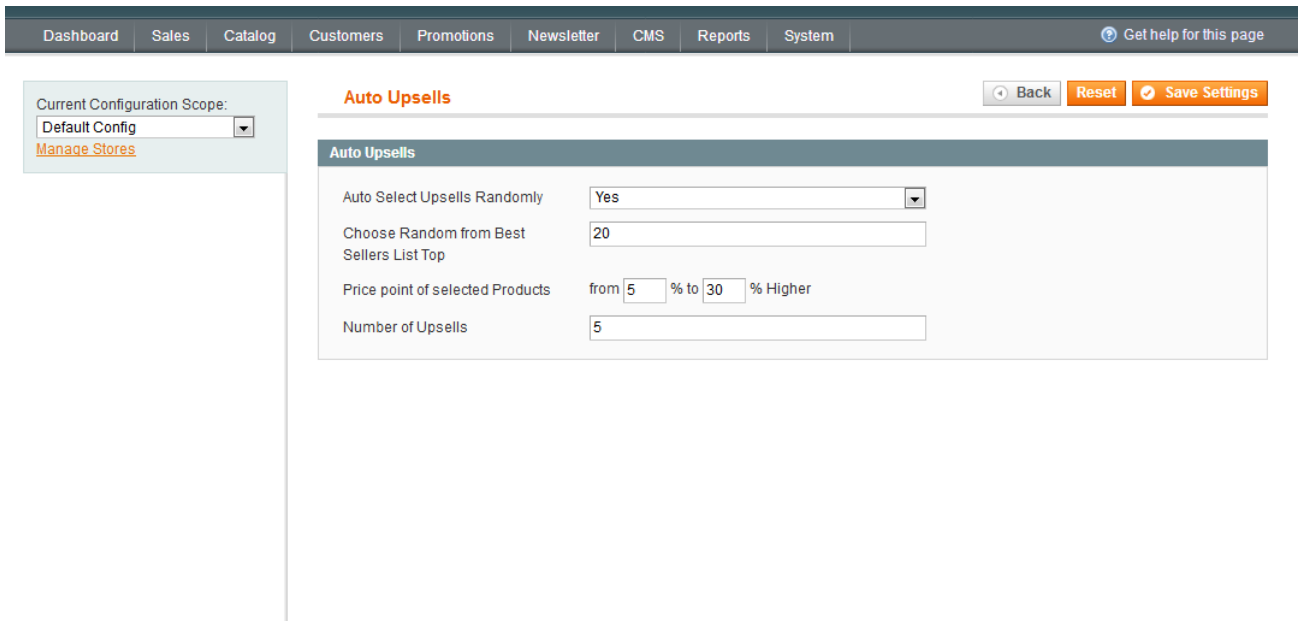

There are three options in the dropdown:

- **Yes** – the extension searches for upsells and substitutes the existing upsells' lists.
- **No** – the extension doesn't add upsells to products.
- **Yes, if list is empty** – the extension searches for upsells and adds them to products, if the original list is empty.

Choose Random from Best Sellers List Top – chooses 20 bestsellers which upsells' lists will be based on.

Price Point of Selected Products – allows the admin to set the price percentage range and searches for products in this specific price range. The price range is set to 5 - 30% by default.

Number of Upsells – shows a set number of upsells on the Frontend. 5 items are shown by default.

The screenshot shows the 'Auto Upsells' configuration page in the Itoris Admin Panel. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', and 'System'. A 'Get help for this page' link is visible in the top right. The main content area is titled 'Auto Upsells' and features a 'Current Configuration Scope' dropdown set to 'Default Config' with a 'Manage Stores' link below it. The configuration options are:

- Auto Select Upsells Randomly:** A dropdown menu set to 'Yes'.
- Choose Random from Best Sellers List Top:** A text input field containing '20'.
- Price point of selected Products:** A range selector showing 'from 5 % to 30 % Higher'.
- Number of Upsells:** A text input field containing '5'.

At the top right of the configuration area, there are three buttons: 'Back', 'Reset', and 'Save Settings'.

3.2 Auto Upsells for a Certain Product

The extension also allows the admin to configure upsells for each product manually following **Catalog > Manage Products > {select a product} > Up-sells.**

Auto Select Upsells Randomly – adds upsells to all products automatically.

There are three options in the dropdown:

- **Yes** – the extension searches for upsells and substitutes the existing upsells' lists.
- **No** – the extension doesn't add upsells to products.
- **Yes, if list is empty** – the extension searches for upsells and adds them to products, if the original list is empty.

Choose Random from Best Sellers List Top – chooses 20 bestsellers based on which upsells' lists will be created.

Price Point of Selected Products – allows the admin to set the price percentage range and searches for products in this specific price range. The price range is set to 5 - 30% by default

Number of Upsells – shows a set number of upsells on the Frontend. 5 items are shown by default.
