1. Introduction

1.1. Purpose

This document is a **User Guide** for **Customer Balance & Rewards module for Magento**. It describes how work with the extension.

Customer Balance & Rewards unites ability to for customers to have a positive balance on the website (via monetary top-ups or transfer of points to money) as well as rewards' system where customers earn points for special actions and can then use these points for future payments

2. Installation and License

2.1. System Requirements

The extension works under Magento from 1.4.x and higher.

The extension works with Apache 1.3.x and higher, PHP 5, Linux or IIS.

The extension's correct work is guaranteed with the following browsers:

- IE7+
- FireFox 4.x+
- Google Chrome 15.x+
- Safari 5.x+

The correct work with other Magento versions, other browsers and Apache/PHP versions is not guaranteed.

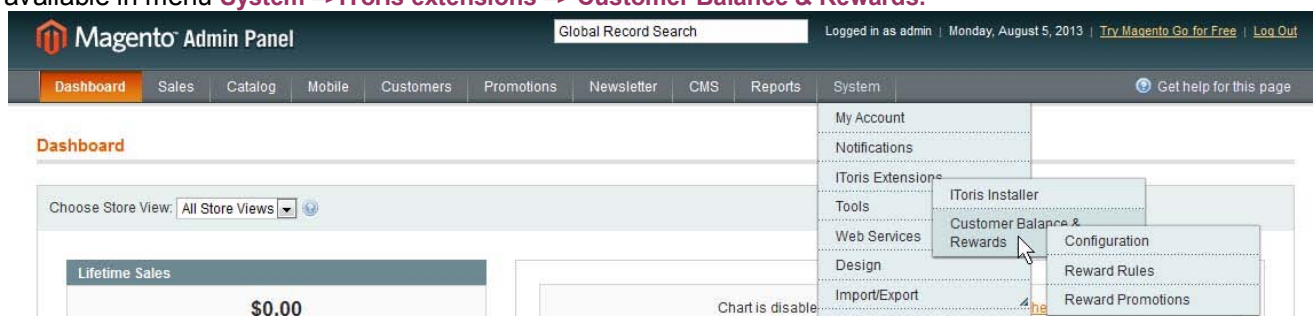

2.2. Installation

All our Magento extensions and templates are installed via **IToris Installer**.

Download **IToris Installer** from here <http://www.itoris.com/itoris-magento-installer.html> and un-pack to the root of your website. It will then appear in menu **System → IToris extensions → IToris Installer**.

Open it and you will see all our Magento Extensions and Templates, both installed and available. You can install, update and un-install them with one click now.

Find **Customer Balance & Rewards** in the list of extensions and press **Install** button. It will ask for the license key that you will receive after the purchase. Enter the key and submit. The extension will be installed. It will be available in menu **System → IToris extensions → Customer Balance & Rewards**.

2.3. License

Customer Balance & Rewards module has 3 types of licenses - regular, premium and multi-host.

Regular license is website-dependent. By 'website' here we understand the website in Magento terms. Under one Magento installation one license key of the extension can activate all stores/storeviews within one website.

Modules with regular license are partially encrypted.

Regular license is installed via IToris Installer.

If your configuration has several Magento websites - a separate license will be required for each.

Premium license provides 100% open-source modules. It allows activating the whole Magento installation, including all its websites, stores/storeviews.

Premium license is recommended when you plan customizations.

Premium license is installed via IToris Installer.

Multi-host license provides ability to install the module to an unlimited number of hosts. It is 100% and is installed as an archive.

You can switch the license from one website to another – login to <http://www.itoris.com> using the credentials you will receive after the purchase. Go to **My Downloads** area, find your key there and reset it from the current website. Then use it again to activate another website.

All licenses also include free life-time updates for the extension.

3. How to Use

3.1. Overview

Customer Balance & Rewards module is a multi-functional Magento extension. There are several ways you will benefit from it:

New purchases are stimulated. Customers purchase products and receive points for the orders, that can be used to partially pay the following orders. As the points can expire (this depends on the settings you select), customers make new orders sooner to redeem their points.

Your store is visited more often. As points can be provided for “purchase-associated” activity - registration, visiting the website, reviews - customers visit your store more often that stimulated purchases as well.

Social activity - points can be provided for referrals, there is ability to share balance with friends - this is a source of new leads for your store from your current customers.

3.2. Configuration

To manage the extension's configuration select **System -> IToris Extensions -> Customer Balance & Rewards -> Configuration**

There will be 4 main areas:

- **General Configuration** - general settings and configurations: how prices and rewards should be displayed, which payment combinations are available, and so on.
- **Account Balance Configuration** - settings and configurations for customers' balance, ability to top up balance in advance as well as convert rewards to balance
- **Rewards Configuration** - settings and configurations for reward points
- **Gifting Configuration** - settings and configurations for gifting area, ability for customers to refer friends, to top up other customers' balance and so on

3.2.1. General Configuration

To manage general configuration select **System -> IToris Extensions -> Customer Balance & Rewards -> Configuration**

There will be a tab **General Configuration** selected by default

The screenshot shows the Magento Admin Panel interface. At the top, there's a navigation bar with 'Magento Admin Panel' and a search bar. Below it, a menu bar contains links for Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Reports, and System. The 'System' link is highlighted. On the left, a sidebar shows 'Current Configuration Scope' set to 'Default Config' and a list of configuration sections: General Configuration, Account Balance Configuration, Rewards Configuration, and Gifting Configuration. The main area displays the 'Customer Balance & Rewards Configuration' page. It has a 'Save config' button in the top right. The 'General Configuration' section includes the following settings:

- Extension Enabled *: Yes
- Product Default Purchase Mode *: Purchase using Price & Reward Points
- Catalog Prices Display Mode *: Prices & Points
- Product Prices Display Mode *: Prices & Points
- Credit or Point Balance Adjustment Email Template: Balance & Rewards: Credit or Point Balance Ad
- Reward Points visible short alias *: RP
- Reward Points visible long alias *: Reward Points
- Show detailed calculation on Checkout: Yes
- Refer a Friend Email Template: Balance & Rewards: Refer a Friend (Default Te

The following configurations and settings are available:

- **Extension Enabled** - when “yes” is selected, the module is enabled
- **Product Default Purchase Mode** - how products can be purchased on the website
 - Purchase using Price Configured Only - standard Magento way, with money only
 - Purchase using Price & Reward Points - with money as well as earned reward points (transferred in money at a special rate)
 - Purchase using Reward Points only - with earned reward points only
- **Catalog Prices Display Mode** - how products prices should be displayed in catalogs of products
 - Prices only - default Magento way, only prices
 - Prices & Points - prices as well as points (at which products can be purchased as an alternative of money)
 - Points only - only points at which products can be purchased
- **Product Prices Display Mode** - how prices should be displayed on product pages
 - Prices only- default Magento way, only prices
 - Prices & Points - prices as well as points (at which products can be purchased as an alternative of money)
 - Points only- only points at which products can be purchased
- **Credit or Point Balance Adjustment Email Template** - which email template should be sent when there is a change in customers' credit or points
 - Do not sent this email
 - {selection of available email templates}
- **Reward Points visible short alias** - how reward points will be marked on product, catalog pages and so on
- **Reward Points visible long alias**
- **Show detailed calculation on Checkout** - if during the purchase reward points have been used (together with money or alone), there will be detailed calculation shown - at which rate pointst are transferred to money, and so on
- **Refer a Friend Email Template**
 - Do not sent this email
 - {selection of available email templates}

3.2.2. Account Balance Configuration

To manage account balance configuration select **System -> IToris Extensions -> Customer Balance & Rewards -> Configuration**

There will be a tab **Account Balance Configuration**

The screenshot shows the Magento Admin Panel interface. The top navigation bar includes links for Dashboard, Sales, Catalog, Mobile, Customers, Promotions, Newsletter, CMS, Reports, and System (highlighted). The main content area is titled "Customer Balance & Rewards Configuration" and features a "Save config" button. The configuration is organized into sections: "Account Balance Configuration" and "Rewards Configuration". The "Account Balance Configuration" section includes settings for enabling the account balance engine, allowing purchases with credits, setting a minimum amount, selecting an email template for credits, and displaying customer balance in various locations (dashboard, side block, list of customers). The "Rewards Configuration" section includes settings for showing balance activity reports and allowing conversion of credits into reward points, with associated conversion rates and minimum amounts.

The following configurations and settings are available:

- **Account Balance Engine Enabled** - when "yes" is selected, customers' balance functionality is activated
- **Allow to Purchase Credits** - ability for customers to top up balance with money and keep it positive
- **Minimum Amount** - the minimal sum of payment's top up. 10 [main currency] set by default, 10 USD on the screenshot above
- **Credits Purchased Email Template** - which email template should be sent to the customer when balance is topped up
 - Do not sent this email
 - {selection of available email templates}
- **Show Customer Balance on Dashboard** - when customers open up their profile they will see their balance in dashboard
- **Show Customer Balance in Side Block** - there will be a special side block added, where customers will see their balance
- **Show Customer Balance in the List of Customers** - from the back-end there will be a new column in Customers -> Manage Customers table, that will show customers' balance
- **Show Balance Activity Report to Customer** - customers will see how much they have topped up, earned (transferred from points) and spent
- **Allow to Convert Credits into Reward Points** - in case there are products/services that can be purchased using reward points only, customers may want to convert their monetary balance into reward points
- **Conversion Rate 100 Points =**
- **Minimum Amount to Convert**

3.2.3. Rewards Configuration

To manage rewards configuration select **System -> IToris Extensions -> Customer Balance & Rewards -> Configuration**

There will be a tab **Rewards Configuration**

The following configurations and settings are available:

- **Rewards System Enabled** - when yes is selected, customers' rewards system is activated
- **Show Available Reward Points on Dashboard** - when customers open up their profile they will see their reward points in dashboard
- **Show Available Reward Points in Side Block** - there will be a special side block added, where customers will see their reward points
- **Show Available Reward Points in the List of Customers** - from the back-end there will be a new column in Customers -> Manage Customers table, that will show customers' reward points
- **Show Points Activity Report to Customer** - customers will see how many points they have earned, transferred from balance and spent
- **Allow to Convert Points into Credits** - ability for customers to exchange their points with money at the set conversion rate
- **Conversion Rate 100 Points =**
- **Minimum Points to Convert**
- **Enable Points Expiration** - if this setting is enabled, points will have "shelf life" period after which they become invalid
 - **Expire after** - expiration period
- **Points Will Expire Soon Email Template** - email notification for the customers to war that their points will expire soon
 - Do not sent this email
 - {selection of available email templates}

3.2.4. Gifting Configuration

To manage gifting configuration select **System -> IToris Extensions -> Customer Balance & Rewards -> Configuration**

There will be a tab **Gifting Configuration**

The screenshot shows the Magento Admin Panel interface. At the top, there's a navigation bar with 'System' highlighted. Below it, a sidebar on the left contains a menu for 'Customer Balance & Rewards' with 'Gifting Configuration' selected. The main content area is titled 'Customer Balance & Rewards Configuration' and contains a 'Gifting Configuration' section with the following settings:

- Gifting Engine Enabled ***: Yes
- Allow to Gift Credits ***: Yes
- Minimum Amount ***: 5 USD (with a link to '0-unlimited')
- Allow to Gift Points ***: Yes
- Minimum Points ***: 50 (with a link to '0-unlimited')
- Send Credits to a Friend Email Template**: Balance & Rewards: Share Balance Credits or

- **Gifting Engine Enabled** - when “yes” is selected, gifting functionality is enabled
- **Allow to Gift Credits** - if customers can present money to other customers (transfer money to their balance)
- **Minimum Amount** - the minimal amount to be gifted
- **Allow to Gift Points** - if customers can present reward points to other customers (transfer points to their balance)
- **Minimum Points** - the minimal amount to be gifted
- **Send Credits to a Friend Email Template** - email notification to be sent when points/money is gifted
 - Do not sent this email
 - {selection of available email templates}

3.2.5. Email Templates

There are pre-created email templates integrated as part of Magento’s email functionality. If you need to edit an email or create a new one - use the standard Magento functionality:

Select **System -> Transactional Emails**. Create a new email template there and select one of the pre-created templates.

Load the template and edit it the way you need. The new email template will be available in the extension’s settings.

The following email templates are available:

- **Credit or Point Balance Adjustment Email Template**
When a balance has been changed - customer will receive this email
- **Refer a Friend Email Template**
This is an invitational email to the referred friend(s)
- **Credits Purchased Email Template**
This email is sent to the customer when credits have been purchased
- **Points Will Expire Soon Email Template**
If points have expiration date - this is a reminder to customers when it is close
- **Send Credits to a Friend Email Template**
This email is received by customers who have achieved credits/points that have been shared with them by their friends

Also 2 standard email templates are changed - a new block with reward points is added:

- **New Order**
- **Invoice**

If you do not want an email to be sent - you can switch it off directly in the settings by choosing “[do not send this email](#)” option.

3.3. Customers Balance

3.3.1. Overview

Balance reflects mutual settlements between customers and website. There are two currencies that are used and can be converted to each other (depending on selected settings) - money and reward points.

If all extension's areas are activated - customers can top up their balance with money (buy credits). This means that they have a positive monetary amount on the website, which can be used to purchase goods/services later on.

Balance also shows all earned reward points. Depending on settings reward points are assigned to customers for certain actions (friends' referrals, reviews writing, other general activity) as well as for purchasing products.

Credits (money) and reward points are exchangeable. Rates and exchange rules can be set in the configurations.

Depending on settings customer can use either credits or reward points or both in combination for future purchases.

Customers as well as administrators (from the back-end) can view the balance history.

3.3.2. Settings

To select or change balance settings and configurations please [see this chapter](#).

3.3.3. Back-end

3.3.3.1. View Customer's Balance

From the back-end administrators can see the customers' balance in the list of customers, as well as detailed information in a customer's profile.

To see current balance (both credits and reward points) administrator can open up the list of customers. There will be 2 new columns there (depending on settings) - **Balance** and **Reward Points**:

| ID | Name | Email | Balance | Reward Points | Group | Telephone | ZIP | Country | State/Province | Customer Since | Website | Action |
|----|------------|----------------------|-------------|---------------|---------|--------------|--------|---------|----------------|-------------------------|--------------|--------|
| 2 | John Smith | john@smith.com | 20.00 [USD] | 100 | General | 647-234-9745 | T6R1S4 | Canada | Ontario | Aug 7, 2013 4:50:54 PM | Main Website | Edit |
| 1 | John Doe | john.doe@example.com | 0.00 [USD] | 0 | General | | | | | Aug 30, 2007 4:23:13 PM | Main Website | Edit |

On customer's details page there is both short and detailed information about the balance available. Short Information is displayed in [Customer View](#) tab:

|---------|-------|------------|----------------|--------------|

Administrators have the following options:

Convert credits into reward points

To do this admin enters the amount of money (credits) to be converted. By default the full available amount is entered in the conversion field.

Administrator cannot enter a larger credit that the customer has available now.

John Smith [Back] [Reset] [Create Order] [Delete Customer] [Save Customer] [Save and Continue Edit]

Manage Credit Balance

Current Balance: 180 \$ Convert Credits into RP: 180 USD = 1800 Reward Points [Convert]

Add Credits to Balance: [] USD (Negative value will subtract the amount from the balance)

Comment to Balance Change: [] [Add Credits]

Manage Reward Points

Reward Points: 360 Convert RP into Credits: 360 = \$ 36.00 [Convert]

Add Reward Points: [] (Negative value will subtract RP from Rewards)

Comment to Rewards Change: [] [Add RP]

When **Convert** button is pressed - the credit is withdrawn from the customer's balance and the reward points are added to it (the conversion rate is set in the configuration, administrator will see it before the conversion).

Add credits to balance

To add money (credits) to the customer's balance administrator enters the amount, adds a comment and presses **Add Credits** button. The money is added to the customer's balance.

3.3.4.2. Balance Management

There are several ways customers can add/earn credits (money) as well as reward points (depending on the selected settings and configurations):

- Top up (credits only) by customer (please [see detail here](#))
- Convert (from credits to reward points and vs. - available balance only) (please [see detail here](#))
- Get rewards for actions on website (please [see details here](#))
- Get rewards for purchases of some products (please [see details here](#))
- Top up by admin (both credits and rewards - please [see more here](#))

Customer can spend both credits (money) and reward points on purchasing goods and services from the website as well as gifting them to friends (other customers) - depending on selected settings and configurations.

When purchasing products/services, customer can pay using a combination of reward points, credits and regular payments.

3.3.4.2.1. Top Up

In addition to the ability to earn credits (depending on settings) customers have ability to top up their balance. There is ability to top up credits (money) only, not points. Yet if there is a conversional rate set, customers then can convert credits into points.

Customer can top up his/her balance in the account (they need to be logged in). There is Top Up link near Account Balance in **Dashboard** as well as in **Manage Balance and Rewards** tab.

The screenshot shows the 'Manage Balance & Reward Points' page. On the left is a 'MY ACCOUNT' sidebar with links like 'Account Dashboard', 'Account Information', 'Address Book', 'My Orders', 'Billing Agreements', 'Recurring Profiles', 'My Product Reviews', 'My Tags', 'My Wishlist', 'My Applications', 'Newsletter Subscriptions', 'My Downloadable Products', and 'Manage Balance & Rewards'. The main content area has a 'Refer a Friend' link. The 'Account Balance: \$175.00' section includes a 'Top Up' button. Below it are two sliders: 'Convert Credits into Reward Points' (ranging from \$20.00 to \$175) and 'Convert Reward Points into Credits' (ranging from 200 to 260). Both sliders have 'Convert' buttons. The 'Gifting' section below has a text input for a credit code and a 'Create Code' button.

When it is clicked - there is a special form displayed for topping up. This is a special case of order payment, so all standard Magento fields required for a purchase are populated. There is also minimal amount for credits displayed (from the settings and configurations):

The screenshot shows the 'Top Up Your Account' form. It includes a yellow box with a lightbulb icon stating 'Minimum amount = \$10.00'. Below this is a 'Buy Credits *' field with a value of 50. There is a dropdown menu for 'Select a billing address from your address book or enter a new address.' with the address 'John Smith, 304 Fairview Street, Toronto, Ontario T6R1S4, Canada'. Below the dropdown are two radio buttons: 'Credit Card (saved)' and 'Check / Money order'. At the bottom right is a 'Top Up' button. A '* Required Fields' label is also present.

Customer enters the amount he/she wants to add to the balance, selects/populated the required fields and presses Top Up button. The credit is added to the balance.

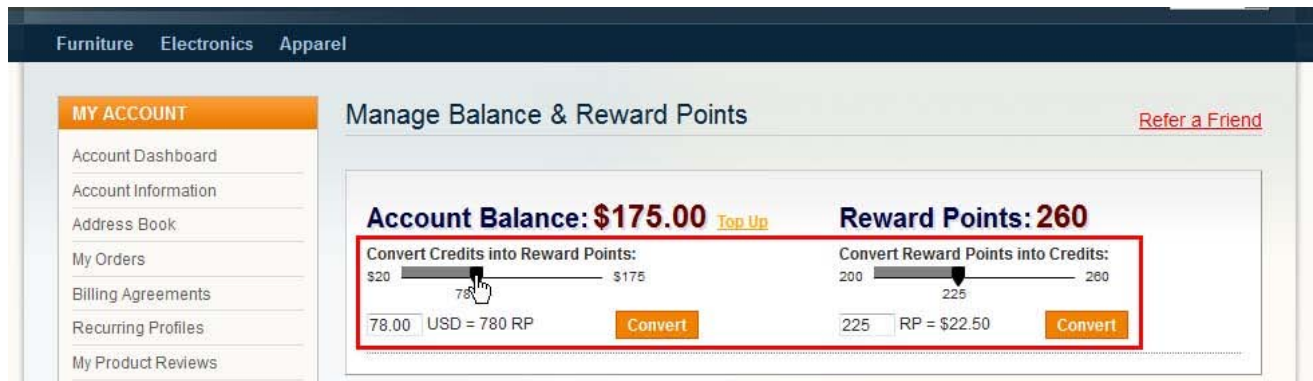

3.3.4.2.2. Conversion

There is ability to convert credits to points and vs. - depending on the settings and configurations. Conversional rate is set there as well.

Customer can convert credits to points or points to credits in the account (they need to be logged in). There is functionality for converting and exchange rates in **Dashboard** as well as in **Manage Balance and Rewards** tab.

There are sliding bars where customers can select how many credits/points to be converted. Minimal value in the sliders is the set minimal amount for conversion. Maximal value - currently available amount the customer has.

As customer changes the values in the sliders - the conversion result is re-calculated in the field below immediately. Customer can also enter a value directly in the field.

After a value has been selected, customer presses Convert button, and the selected credit amount/number of points is converted and added to the balance.

3.4. Rewards System

3.4.1. Overview

Reward system is the functionality that promotes the store and encourages customers to make purchases as well as be active on the website in order to get rewards that can be spent on future purchases.

Rewards can be monetary (credits) as well as points.

Administrator from the back-end create rules and promotions based on which rewards are earned.

These rules can include registration on the website, making a purchase (first, any, larger than a set amount, and so on), participation in reviews, signing for newsletters, referrals.

Promotions deal with purchases of special products. Rules can be based on different attributes of products, their combinations and so on. There is ability to set time limitation for the promotions.

3.4.2. Settings

To select or change rewards' system configuration and settings please [see this chapter](#).

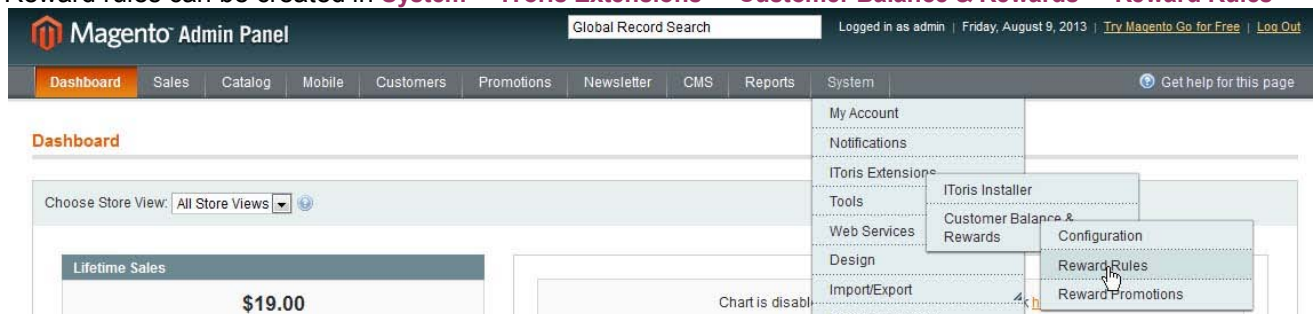

3.4.3. Back-end

Administrators from the back-end can view as well as manage customers' rewards. Please [see this chapter](#) for more information.

Administrators also create reward rules and promotions.

3.4.3.1. Rewards' Rules

Reward rules can be created in **System -> IToris Extensions -> Customer Balance & Rewards -> Reward Rules**

There is an area for creating new rules as well as managing the existing ones.

Reward Rules [Add New Rule](#)

Page 1 of 1 pages | View 20 per page | Total 3 records found [Reset Filter](#) [Search](#)

[Select All](#) | [Unselect All](#) | [Select Visible](#) | [Unselect Visible](#) | 0 items selected

| | Rule Name | Rule Type | Balance Credits | Reward Points | Start Date | End Date | Status | User Groups | Store Views | Action |

| <input type="checkbox"/> | Product Review | Product Reviewed | | +120 | | | Enabled | All Groups | All Store Views | Edit |

To create a new rule administrator presses Add New Rule button. This opens up an area for creating a rule. Administrator selects a rule type:

Reward Rule [New Reward Rule](#) [Back](#) [Reset](#)

Settings

Rule Settings

Please select a Rule Type: Customer Registration [Continue](#)

and presses Continue button.

The following rule types are available:

- Customer registration
- Customer made first order
- Customer made any order
- Customer made a large order
- Poll voted
- Product sent to a friend and purchased
- Sign up for a newsletter
- Product tagged
- Product reviews
- Customer birthday occurred
- Referred customer registered
- Referred customer made first order
- Referred customer made any order

Depending on the selected type there can be additional fields (for example, for large orders there is ability to enter the minimal order amount).

There are also general rule's fields common for all types:

Send Email to Customer

The following fields should be populated to create a promotion:

- **Rule Name** - how the rule will be displayed in the list of rules and in the rewards history.
- **Condition** - here administrators set a condition or a combination of conditions that should be fulfilled in order to receive a reward. Please see a screenshot with sample below.
- **Status** - only enabled rules will be applied
- **Start Date, End Date** - if you set the date range, rule will be applied only within these dates. Otherwise, it will be applied all the time while it stays enabled.
- **Add Balance Credits, Add Reward Points** - how many credits and/or reward points customers will receive when the rule is performed.
- **Store Views** - you can limit the rule to be applied on selected stores only. By default all stores are selected.
- **User Groups** - you can limit the rule to be applied for selected customer groups only
- **Send email to customer** - when this setting is checked, there are additional fields displayed for the email to be sent.

Condition sample - customer who purchase an Apple product that costs more than \$1500 during the period from the 11th to the 25th of April will earn 200 reward points:

The screenshot shows a form for creating a promotion rule. The fields are as follows:

- Rule Name ***: 200 points for Apple products
- Conditions ***: If **ALL** of these conditions are **TRUE**:
 - Brand **is** **Apple** (with a red 'x' icon)
 - Cost **greater than** **1500** (with a red 'x' icon)
 - A green plus icon is shown below the conditions.
- Status ***: Enabled (dropdown menu)
- Start Date**: 2013-08-11 (calendar icon)
- End Date**: 2013-08-25 (calendar icon)
- Add Balance Credits**: (empty text box)
- Add Reward Points**: 200

Additional fields for email templates are the following:

The screenshot shows a form for configuring email templates. The fields are as follows:

- Send Email to Customer**: ☒
- From Name ***: (empty text box)
- From Email ***: (empty text box)
- CC**: (empty text box)
- BCC**: (empty text box)
- Subject ***: (empty text box)
- Format ***: HTML (dropdown menu)
- Email Body ***:
 - Show / Hide Editor**: (toggle button)
 - Rich Text Editor**: (toolbar with various icons for text formatting, alignment, and insertion)
 - Skin image**: (placeholder image with a dashed border)

3.4.3.3. Rules for a Single Product

Settings reward rules and promotions for products usually means they will be applied to a group of product (a category, or a number of products selected by an attribute, and so on).

In addition to this you can set special rules for selected products individually. To do this open up a product, there will be a new tab **Purchase Rules**:

Choose Store View: Default Values

Reward System: Purchase Rules

Purchase Mode: Purchase using Reward Points only

Product Price in Reward Points Mode: Override Price in Reward Points

Product Price in Reward Points *: 300

| Website | Customer Group | RP | Action |
|-----------------|----------------|----|--------|
| Add Group Price | | | |

| Website | Customer Group | Qty | RP | Action |
|----------|----------------|-----|----|--------|
| Add Tier | | | | |

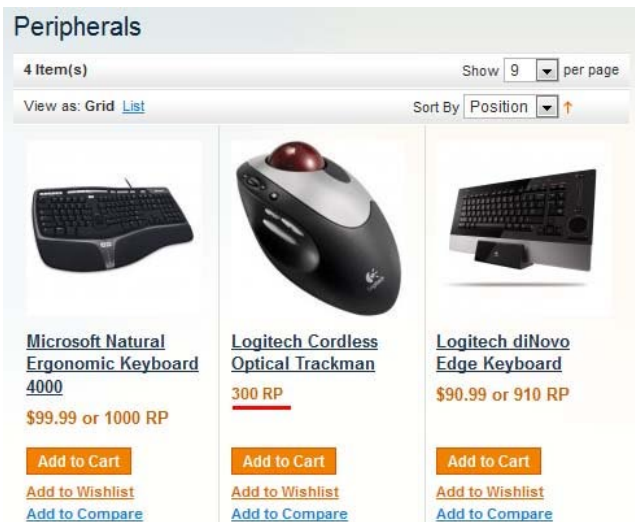

Purchase using RP is allowed from (inclusive):

Purchase using RP is allowed to (inclusive):

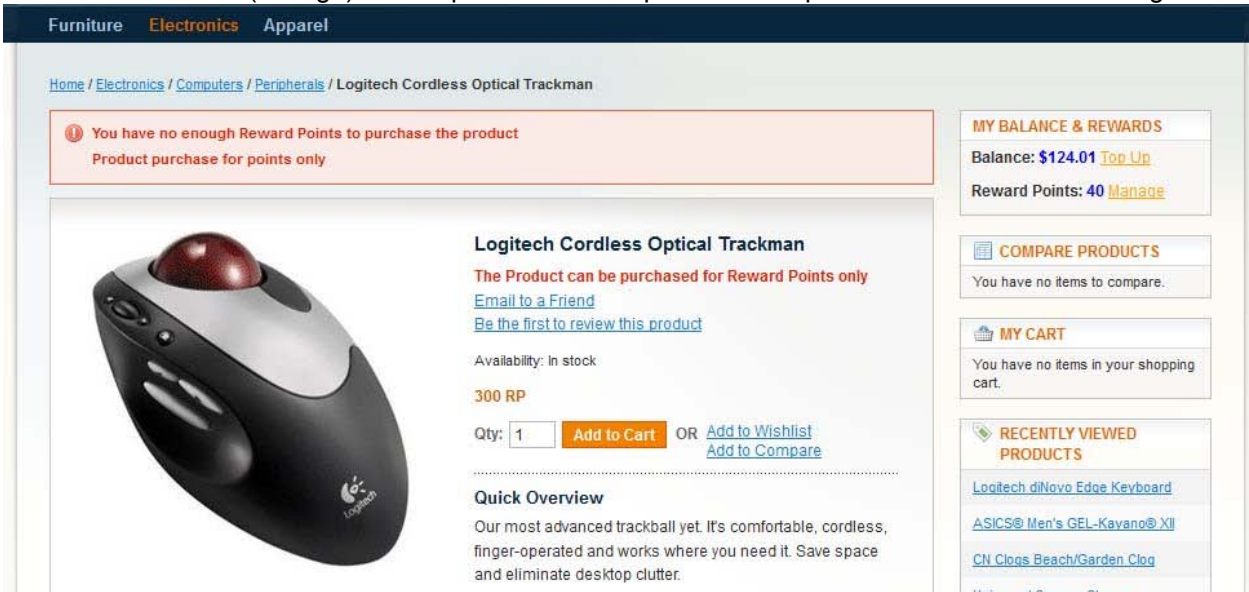

The following settings are available there:

- Purchase Mode**
 How the product can be purchased. The following options are available:
 - Global - will be taken from the global settings and configurations
 - Purchase using price configured - product can be purchased with a regular payment or for a credits only
 - Purchase using price & reward points - product can be purchased with a regular payment or for a credit as well as for reward points
 - Purchase using reward points only - only reward points can be used to purchase this product. If a customer has no (enough) points, he/she will not be able to complete the purchase.
- Product price in reward points mode**
 - Calculate automatically based on exchange rate - conversion rate from the settings will be taken
 - Override price in reward points - special price will be used for this product. When this setting is selected, there are additional settings:
 - Product Price in Reward Points - set the "cost" of this product in reward points
 - Group Price in Reward Points - ability to set a special points' price for groups
 - Tier Price in Reward Points - ability to set a special points' tier price
- Purchase using RP is allowed from (inclusive)/Purchase using RP is allowed to (inclusive)**
 You can limit this rule with a period of time during which it will be applied - or leave it "permanent"

Please see the settings in the screenshot above (the product can be purchased for reward points only, 300 points). Customers will see the following:

If a customer has no (enough) reward points - effort to purchase the product will show the following message:

3.4.4. Front-end

3.4.4.1. Earning Rewards

There are several ways customers can earn rewards. This depends on the settings and configurations in admin area.

Rewards earning can be for special activity on the website (registration, reference, participation in the polls, and so on) as well as for purchasing special products or product combinations.

Apart from earning there are other ways of getting rewards (administrator can provide them manually, customers can top up their balance themselves, there can be gifts from other customers).

For purchasing products

Let us, for example, create a rule that customers, who purchase any shoes during the period from August, 08 to August, 15 get 300 reward points:

Magento Admin Panel Global Record Search Logged in as admin | Monday, August 12, 2013 | [Try Magento Go for Free](#) | [Log Out](#)

3.5. Gifting System

3.5.1. Overview

Gifting system provides ability for customers to preset their reward points and/or credits (depending on settings) to other customers.

When points or credits are gifted - customer initiates generation of a special code that then is sent to the friend. Codes are redeemable in the customers' account.

3.5.2. Settings

Please see more details about gifting system's settings [in this chapter](#).

3.5.3. Front-end

3.5.3.1. Gifting Credits and/or Points

Customers can gift credits and/or points to their friends in their account. To do this customer can either click [Gift Credits](#) or [RP](#) link in the **Dashboard**,

| b965b2ad41af682d861dc0f794bc6150 | \$5.00 | 100 | New | Cancel Code Notify Friend |

If you received a Credit Code from a Friend you can load it here. Credit Code: [Load](#)

Did you know?
Our customer service is available 24/7
(555) 555-0123
Hold on, help is on the way

There will be a special area for gifting.

Customer sets the number of points and credits to be gifted using the sliders and presses **Create Code** button. This generates a new code, shows a message that the code has been created and adds the code to the customer's account:

 Credit Code (34695ea273a25e9e94dec5d52e551718) has been created

Manage Balance & Reward Points

[Refer a Friend](#)

Account Balance: **\$239.01**
