1. Introduction

The document is a User Guide for extension **View More Products (Infinite Scroll)** created for Magento websites. It describes the extension functionality and provides some tips for a quick start.

The extension official page – <https://www.itoris.com/magento-view-more-products.html>

The purpose of the View More Products extension for Magento is to load the next page automatically with AJAX, avoiding “next page” clicks. There are several ways to surf a catalog: the “Load More” button and infinite scroll. The admin can customize the button by changing its title or editing the load more text. The product auto-loading is available on category pages and search results pages. All the settings can be configured for each store view as well.

2. Installation

2.1. System Requirements

The extension works under Magento from 1.4.x and higher.

The extension works with Apache 1.3.x and higher, PHP 5 or higher, Linux or IIS.

2.2. Installation

Download the extension installation zip package from your account at <https://www.itoris.com/> and unpack it to the root of your Magento site by (S)FTP. Then flush cache in your Magento backend following **System > Cache Management**.

2.3. License

Please find the license agreement at <https://www.itoris.com/magento-extensions-license.html>

3. How to Use

3.1. General Settings

The general settings are available in **System > ITORIS Extensions > View More Products**.

Extension Enabled – enables or disables the extension.

Loading More Text – allows customizing the text that will be available while scrolling the pages.

View More Text – allows customizing the text that customers press to view more products.

Load more method – there are two options available.

- **By clicking button** - loads more products using the button.
- **On page scroll automatically** – showing the next pages automatically when the customers scroll the pages down.

The screenshot shows the 'View More Products Configuration' page. At the top, there is a navigation bar with tabs for Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, and System. A 'Get help for this page' link is also present. Below the navigation bar, there are three buttons: 'Back', 'Reset', and 'Save Settings'. The main content area is titled 'View More Products Configuration' and contains the following settings:

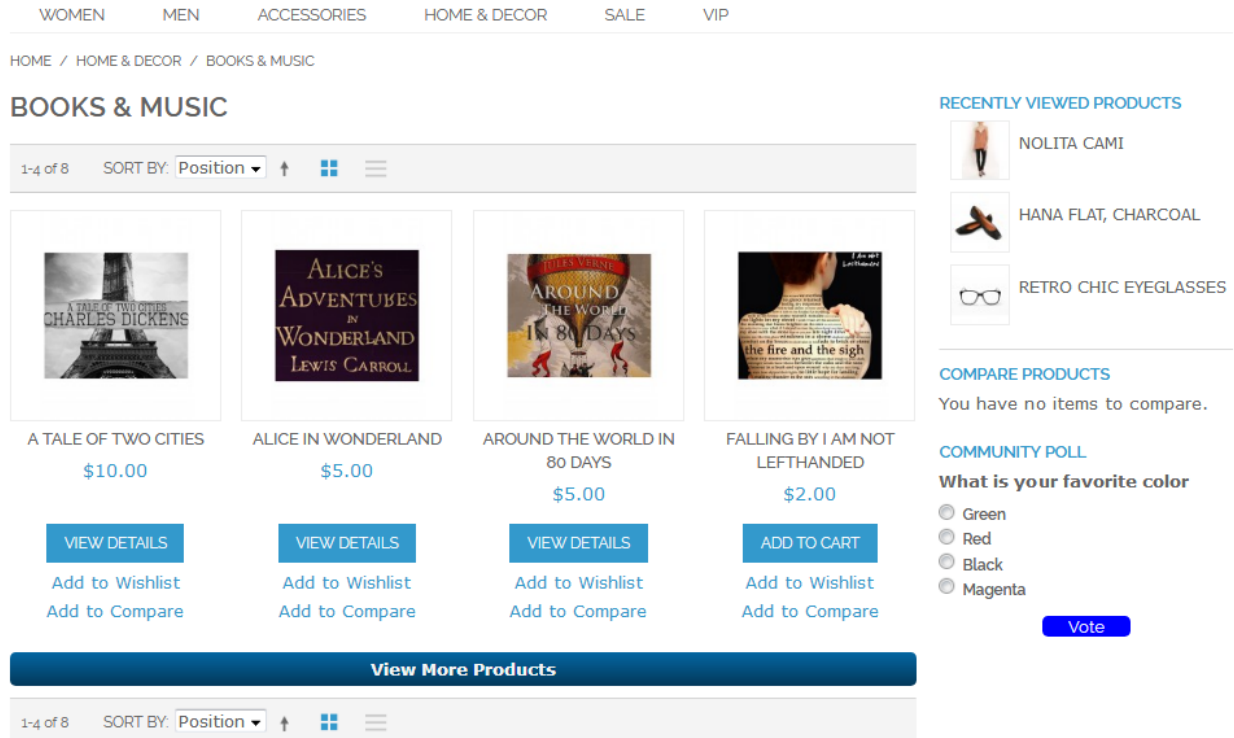

View More Products	
Extension enabled	Yes
Loading More Text	Loading more products...
View More Text *	View More Products
Load more method	By clicking button

On the left side of the configuration page, there is a 'Current Configuration Scope' dropdown menu set to 'Default Config' and a 'Manage Stores' link.

3.2 Frontend

3.2.1 View More Products Button on Category Pages

The admin can choose one of the two methods to go to the next pages. If the button is selected, the customers can click the button and a new set of products will be loaded.

3.2.2 Scrolling on Category Pages

Auto-scrolling shows the next page automatically once the users scroll to the bottom of the page.
